

Adeline Tung
Director, Policy & Technology
Personal Data Protection Commission, Singapore

Ms Adeline Tung oversees and drives the formulation of data and technology policies to enable the use of data in a responsible and trusted manner, in her role as Director, Policy & Technology at the Personal Data Protection Commission (PDPC) and Infocomm Media Development Authority (IMDA) of Singapore.

Adeline has spent majority of her career with the Singapore public sector, with experience in various economic and industry development, as well as planning and policy roles. With the Singapore Economic Development Board (EDB), she was involved in formulating and implementing industry strategies and plans for various sectors as well as engaging with key investors and partners of Singapore. She has also led the Industry Division on ICT & Media policies as Director, Industry, at the Ministry of Communications and Information (MCI). Prior to her role with the PDPC, she was Director, Planning, and led the strategic planning, corporate planning, corporate group planning and research & statistics units at the Agency for Science, Technology and Research (A*STAR).

With her current role, Adeline is interested in emerging data technologies, and helping to shape the data regulatory landscape in Singapore to enable innovative and responsible use of data.

Adeline graduated with a Bachelor of Science in Engineering from the University of Michigan, Ann Arbor, and a Master of Science in Mechanical Engineering from Stanford University.
